

FOR IMMEDIATE RELEASE

Praxis Engineering is selected by *The Washingtonian* magazine as a Great Place to Work 2011

(Annapolis Junction, MD) October 20, 2011 -- Praxis Engineering, a leading provider of software development and system engineering solutions to the Federal Government, was named by *The Washingtonian* magazine as one of the "Great Places to Work 2011".

This year's 50 winning workplaces were chosen on the basis of such measures as: generous pay and benefits, challenging and interesting work, great work/life balance, opportunities to learn and grow, financial stability, commitment to charity and community, and the recognition and respect given to employees. Winners were chosen after a panel of editors and writers reviewed more than 200 companies and some 13,000 employee surveys. The final determinations relied heavily on the scores given by a company's employees.

"We are honored to be named one of the "Great Places to Work" by such a respected publication as the *The Washingtonian* magazine," stated Bill Dunahoo, Co-Founder and President of Praxis Engineering. "It is nice to know that our employees feel we are providing an environment for them to achieve both their personal and professional goals" added Mr. Dunahoo.

"This is a truly remarkable achievement for the Praxis family," said Mark Klein, Co-Founder and Executive Vice-President of Praxis Engineering. "Like any service-based company, the employees are the company and our most valued asset. Our employees are in high demand and have many options, we are so happy they chose Praxis," he added.

This is the seventh time *The Washingtonian* magazine has chosen Great Places to Work in the Washington, DC area. The feature dates back to 1999; it is published every other year.

About Praxis Engineering

Praxis Engineering, headquartered in Annapolis Junction, Maryland, with significant presence in Chantilly, VA, is a consulting and solutions firm dedicated to the practical application of engineering technologies to ensure the success of our customers. Praxis brings together world class engineering talent combined with engineering best practices, domain expertise, commercial technologies, and proven agile management approaches to create high-value solutions aimed at helping our customers meet their mission-critical needs.
