

Praxis Engineering's Christian Sause will be assuming leadership of the Dallas/Fort Worth Metroplex Rational User Group

Annapolis Junction, MD, August 5, 2008 - Praxis Engineering, a leader in software and systems engineering technologies, announced today that Christian Sause will be assuming leadership of the Dallas/Fort Worth Metroplex Rational User Group. Christian will be taking over leadership for Phil Bardasian, of Bardasian Technical Consulting. Phil started the group last October and rapidly built a core membership of over 160 professionals.

The DFW Metroplex Rational User Group is dedicated to supporting the IBM Rational Suite of tools throughout the DFW Metroplex area. This group supports all IBM Rational tool sets and covers Government agencies as well as major commercial companies in the Metroplex area. The main goal of the DFW Metroplex Rational User Group is to increase communication, share best practices, learn about emerging technologies and improve the knowledge of its members.

Christian Sause, Project Manager for Praxis Engineering states, "I am proud to be assuming leadership and expanding on the great work that Phil has accomplished. My intention is to continue to reach out to the academic, Government, and commercial sectors in the DFW Metroplex area. I look forward to growing the organization and keeping it relevant by leveraging our vast knowledge of the Rational suite and providing the group with the same great information as Phil has successfully done in the past."

"I could not be happier to be handing over the leadership role to Praxis and Christian," states Phil Bardasian, of Bardasian Technical Consulting. Phil continues, "Praxis has a long standing relationship with Rational, a reputation for quality and commitment, and the resources necessary to keep the group vibrant."

About Praxis Engineering

Praxis Engineering, headquartered in Annapolis Junction, Maryland, is a consulting, products, and solutions firm dedicated to the practical application of software and system engineering technologies to ensure the success of our customers.
