

Praxis Engineering is named finalist for 2008 IBM Rational Awards

June 11, 2008 - Praxis Engineering, a leader in software and systems engineering technologies, announced today that the company has been named a finalist for the 2008 IBM Rational Awards. Praxis Engineering's solution was highlighted, along with the solutions of other finalists during the June 2008 Rational Software Development Conference in Orlando, Florida.

The Rational Awards give emphasis to the top Rational Business Partners who have excelled in offering their customers quality software, services and solutions in 2007. These Awards are presented to IBM PartnerWorld Business Partners and recognize those leading partners who have devoted their time and energy to building innovative solutions or new integrations around the IBM Rational toolset and Software Delivery Platform.

Steve Murphy, Manager of Federal Sales for Praxis Engineering states, "After winning the prestigious IBM Rational Beacon Award in 2005 and being selected as a Beacon Award runner-up in 2007, this additional award to Praxis is truly remarkable considering the strength and depth of competition from around the world. These awards are a true reflection of the challenging problems we solve for our customers every day. They are a testament to the hard work, engineering expertise and customer commitment embodied in every Praxis employee."

"Praxis is pleased to be recognized by the IBM Rational Award judges as a finalist for the Outstanding Rational Change and Release Management Solution which was presented at the Rational Software Development Conference in June," said Mike Short, Senior Product Specialist. Mike continues, "This award acknowledges Praxis' dedication and commitment to our long standing relationship with IBM, our technical ability and our commitment to customer success."

About Praxis Engineering

Praxis Engineering, headquartered in Annapolis Junction, Maryland, is a consulting, products, and solutions firm dedicated to the practical application of software and system engineering technologies to ensure the success of our customers. Praxis Engineering brings together world class engineering talent combined with software engineering best practices, domain expertise and commercial technologies to create high-value solutions aimed at helping our customers meet their mission critical needs.
