

immixGroup and Praxis Engineering Align to Provide IBM Software Products and Implementation Services to Government Market

Combined Offerings Simplify Procurement and Facilitate Time to Value for Government Customers

MCLEAN, VA and ANNAPOLIS JUNCTION, MD—March 26, 2007 —immixGroup Inc., a leader in government technology representation, and Praxis Engineering, a leader in software and systems engineering technologies, today announced a partnership to facilitate time to benefit of IBM software solutions in the government marketplace. Through this first of its kind teaming arrangement, government customers can purchase the IBM Software products that immixGroup represents and the implementation services that Praxis provides, simultaneously in a single procurement.

“By combining Praxis’ deep technical skills with the strength of immixGroup’s government offerings, we can provide a more complete and unmatched offering to our joint customers in the government market,” said Jerry Schepers, vice president of sales and marketing at Praxis. “This allows our customers a more rapid and efficient way to procure IBM products and services – speeding their time to value. Praxis is proud to be entering this relationship with such a well known and respected provider of government services as immixGroup”.

“As our longstanding role as a major provider of IBM software products in the government marketplace continues to expand, immixGroup’s partnership with Praxis is a logical extension of the value we provide to our government customers,” said Art Richer, senior vice president, immixGroup. “We have already begun to demonstrate the value Praxis’ strong implementation services combined with immixGroup’s expertise in providing IBM software products in the government market, and look forward to continuing to do so moving forward.”

About immixGroup, Inc.
