

Praxis Engineering Joins Trolltech's Reseller Program

Praxis Engineering, a leader in software and systems engineering technologies, announced it has become a Reseller Partner with Trolltech®. The partnership will add services to support the sales and use of Trolltech's Qt®, the leading cross-platform software development framework.

Qt sets the standard for high performance, cross-platform software development. Some of the world's largest software companies rely on Qt to create innovative, advanced solutions across multiple platforms. Qt benefits from a large open source and commercial development community with a growing ecosystem of partners providing programming skills, technology, consulting, integration and training services.

Steve Murphy, Manager of Federal Sales for Praxis states: "Praxis Engineering is excited to be entering into this partnership with Trolltech which will enable us to introduce Qt, an advanced solution for cross platform development, to our customers. Consistent with our commitment to customer success, Praxis will provide a complete solution for our clients including reselling the Qt product line, complete training and value added services. The partnership with Trolltech allows Praxis to expand the breadth and quality of our software and services offerings which our clients have come to depend on."

"Trolltech® is pleased to have Praxis Engineering as a partner," said Ted Driscoll, director of sales, Trolltech, Inc. "The combination of Trolltech's Qt with Praxis' commitment to technical excellence and customer success is a tremendous benefit for our customers. This partnership will further extend Trolltech's reach into the markets which Praxis serves so well."

About Trolltech

Trolltech is the company that makes software faster to build and easier to use. Trolltech's magic inspires software innovation and drives improved usability. The magic is the combination of efficient software development with an innovative, high-quality user experience.

The company's family of products includes Qt, which sets the standard for high-performance, cross-platform software development; and Qtopia[®], the unrivaled application platform for the efficient creation of Linux devices.
